

Connecting the dots: moving together towards agroecology

Regional Multi-Actor Research Networks

The Regional Multiactor Research Networks in Africa on Agroecology (RMRN) strengthen knowledge creation related to food systems transformation towards higher levels of sustainability and based on agroecological principles for a green transition in Africa.

The RMRN strive to

- strengthen scientific and research capacities to produce, collect, access, process, share data on agroecology principles and practices
- develop adapted solutions and innovations to the needs of local stakeholders; i.e. for smallholders, women and youth
- foster comprehensive curricula on agroecology in higher education
- promote partnership and collaboration between academic institutions and relevant networks promoting agroecology on the continent
- support evidence-based policies supporting agroecology principles and practices

Information on the RMRN

RMRN Africa:

- FARA
- RuForum
- Scientific Support: JRC

RADiUS

Réseau en agroécologie pour promouvoir la durabilité des systèmes alimentaires en Afrique de l'Ouest et du Centre

Coordinators:

- **CORAF, Senegal**
- **Université Cheikh Anta Diop, Senegal**

Partners:

- University of Ouagadougou
 - Catholic Relief Services
 - CIRAD
 - Université Felix Houphouet Bogny
- Burkina Faso
USA
France
Côte d'Ivoire

RMRN-EA

Regional Multi-Actor Network on Agroecology in East Africa

Coordinator:

- **International Centre of Insect Physiology and Ecology (ICIPE), Kenya**

Partners:

- Makarere University
 - Sokoine University
 - University of Nairobi
 - National Agricultural Research Organisation (NARO)
 - Kenya Agricultural and Livestock Research Org. (KALRO)
 - Tanzania Agricultural Research Organisation (TARI)
 - CIRAD
- Uganda
Tanzania
Kenya
Uganda
Kenya
Tanzania
France

RAENS

Research for Agroecology Network of Southern Africa

Coordinators:

- **CCARDESA, Botswana**
- **University of Cape Town, South Africa**

Partners:

- University of Agriculture (LUANAR)
 - Marondera University of Agricultural Sciences and Technology (MUASt)
 - Sokoine University of Agriculture (SUA)
 - Research Institute of Organic Agriculture (FiBL)
 - International Centre for Research in Agroforestry (ICRAF)
 - Zambia Agricultural Research Institute (ZARI)
 - Young Professionals for Agricultural Development (YPARD)
- Malawi
Zimbabwe
Tanzania
Switzerland
Kenya
Zambia
Germany

Discussion Paper

How can agroecology contribute to improving food security in Africa?
